SAFE SHORELINE ENTERTAINMENT CORPORATION

By:
Bharat Singh (Project Lead)
Gert Xani (Tech Lead)
Paakwesi Yankson (Business Consultant)

Mission:

"TO PROVIDE SAFE BEACH EXPERIENCE, ATTRACT MORE VISITORS AND BOOST LOCAL ECONOMY"

Overview:

01

Propose safe location and time for your seashore leisure

02

Data Set:

Shark Attack Quest

The data set contains the logged data for shark attacks around the world at different locations by the people in their reports including the severity of the attacks by time and activity

03

Data Analysis:

I. Trend analysis over past 20 years

II. Top activities during which attacks were reported

III. Time of day

IV. Attacks count and fatality rate by countries

Data wrangling and cleaning

Step 1

Removal of all blank column and rows to bring down the scale of data

Step 2

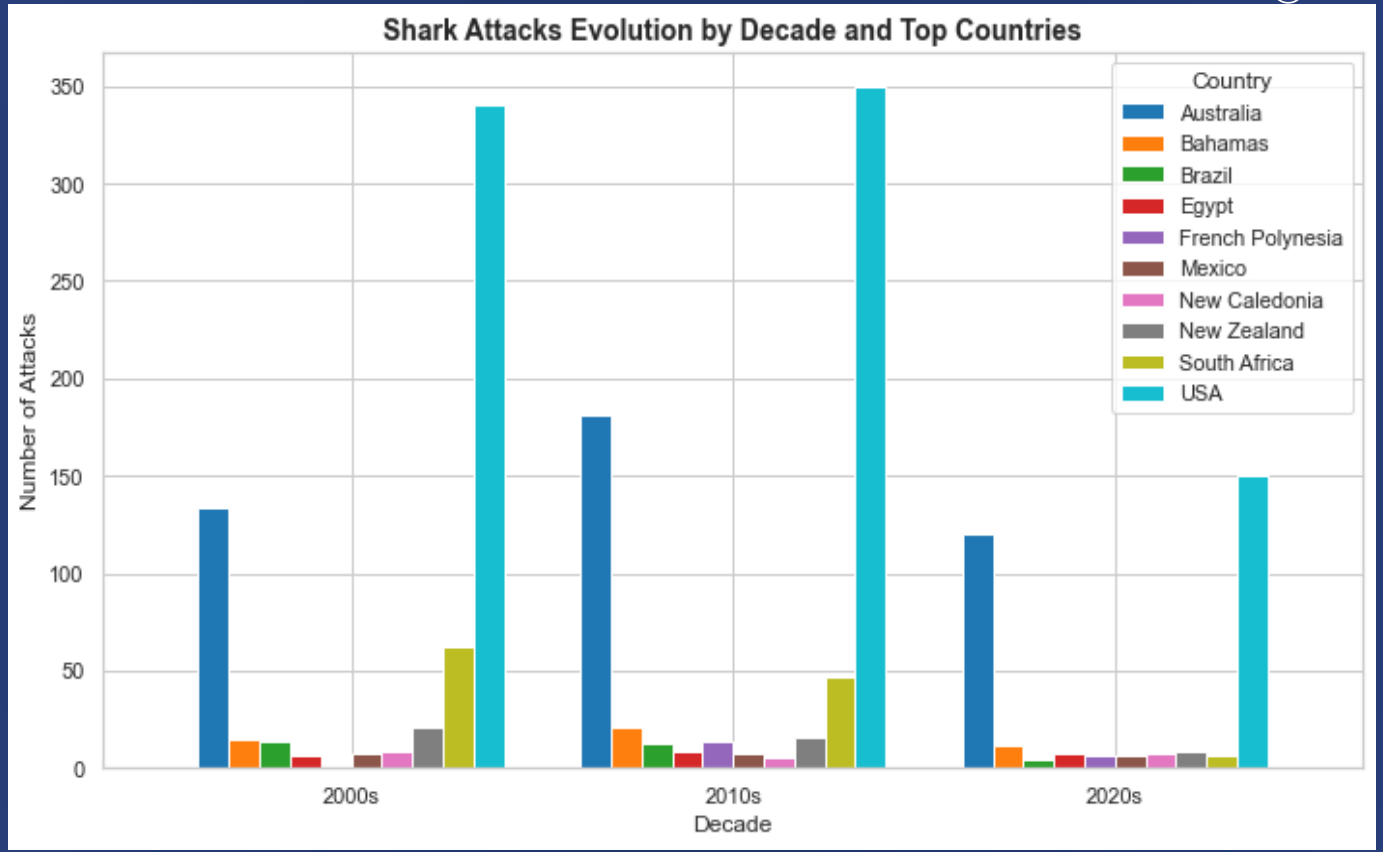

I. Dropping the unwanted data which are not necessary for the analysis.
II. Dealing with null values, clearing out expressions, check on duplicates, dtype transformation, standardisation

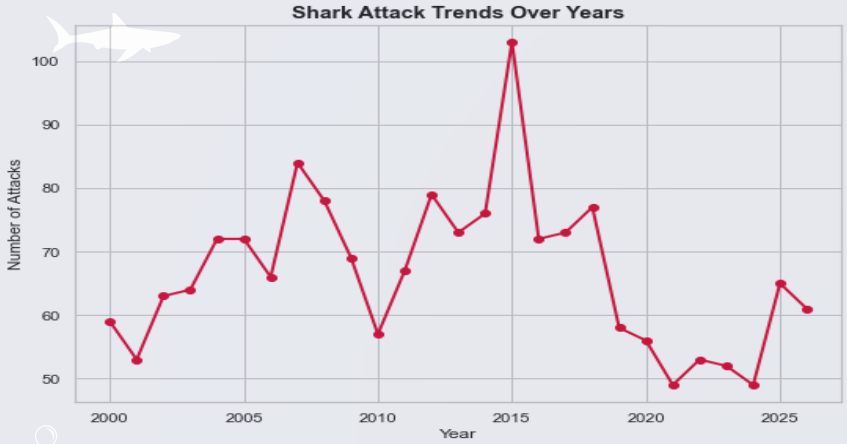

Step 3

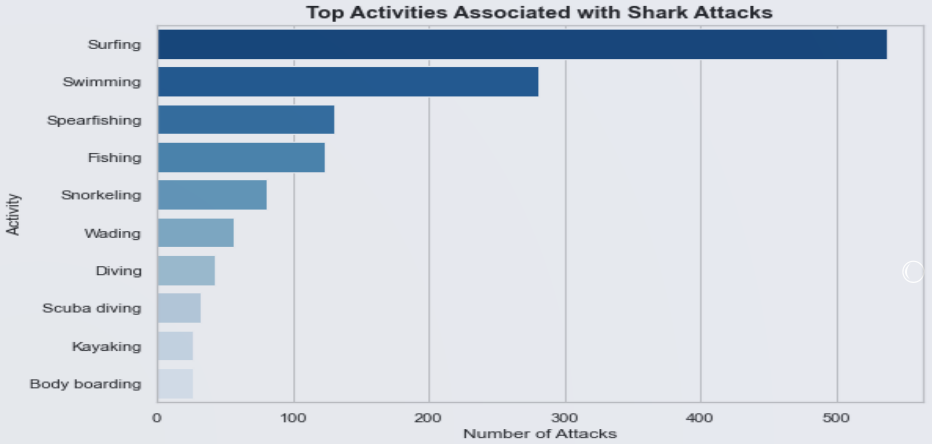

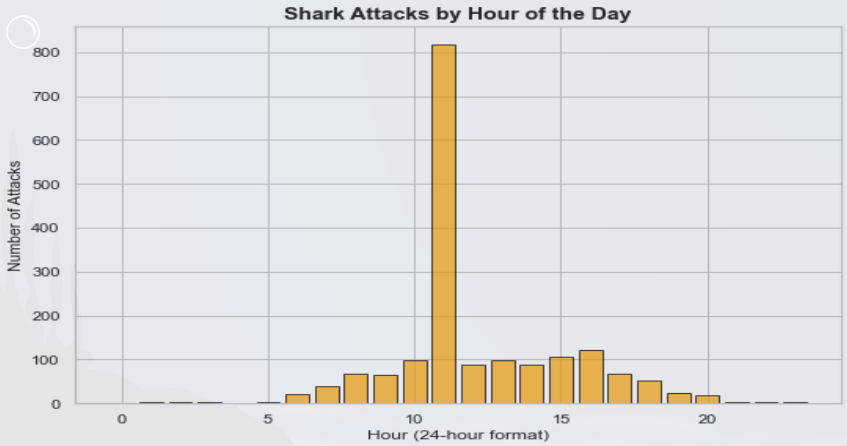

I. Aggregate analysis.
II. Analysis through tables for the insights.
